

# Hawker College Study Skills

## Introduction

Hawker College Study Skills is for every student. In the Study Skills pages, the teachers from the Study Support program have put together some of the guideline pages that students have found helpful. There may be two or more entries on one topic so that you can choose the one that is most helpful for you.

Of course every assignment is different and your first task is always to examine carefully the instructions that you have received. These pages are for you when you are seeking further advice.

If you find an area that that we have not yet covered, please contact the Study Support teachers so that we can add to the pages in ways that are relevant to your needs.
