Hawker College Values

Values are personal qualities or traits that are held in high regard. Values are determined by the beliefs or standards that we hold, these in turn drive our behaviours.

Hawker College’s four Values

- Honesty
- Excellence
- Fairness
- Respect

As everybody has different ideas about what each of these principles mean, it is important that the college define what each value is, and how students are expected to behave when they are following these values.

In 2013 our students were asked for their input into what these values meant to them. A collation of their meanings was used to create ‘Wordles’. To help you understand Hawker college Values, we have included them, followed by a short explanation.
Honesty means a student is truthful with themselves and others, about their situation and actions. Students are expected to act with integrity and be responsible for their choices.

Excellence is about doing your best, having high expectations and taking pride in your learning achievements.
At its best, **Respect** celebrates people’s differences. As a minimum, Hawker expects its students to accept each other’s differences. It also means we look after the college environment and resources.

**Fairness** at Hawker College is about students and staff being considerate of the needs and dignity of its community members. Fairness is not about everyone getting the same.
