

Course Title: AUTOMOTIVE TECHNOLOGY (A/V)

Unit Title	Lines	Unit Description
Automotive Fundamentals 1	3 & 5	Students need have no prior automotive or mechanical understanding as the course starts with simple engines and works through the many functions and components of a motor car. The course is largely practical but does involve a structured theory component.
Automotive Engine Systems	6	Students will work with multi cylinder engines, learning how to disassemble and reassemble, and how the various systems of the work. The course requires students to trouble shoot problems and repair or replace as necessary. At least one component of an engine will be overhauled to reconditioned state.
