

Course Title: BIOLOGY (T)

Students choose biology because they find the living world fascinating and they wish to understand it better. There are no prerequisites for entry to the course.

Unit Title	Line	Unit Description
Introductory Biology (There are no prerequisites for this unit)	1, 5 & 7	In this unit, offered in semester 1, students learn about cell structure, cell function, cell chemistry and microscopes.
How Living Things Work (it is recommended that you do Introductory Biology before attempting this unit)	3	This unit, offered in semester 1, introduces students to the basic life structures and processes of plants and animals.
The Nature of Ecosystems (There are no prerequisites for this unit)	4	Students learn the components of ecosystems and how ecosystems change over time. These ideas are then used to understand changes in Australian ecosystems over time.
